📍 Tan Binh, HCM City, Viet Nam

ABOUT ME

- 3rd-year IT student, focusing on UI/UX design and frontend development.
- I'm using User-centered design and the Design Thinking framework to build a meaningful interface and experience.
- Familiar with responsive design and utilizing web performance.
- Specializing in React.js, Tailwind CSS, and modern JavaScript

EDUCATION

HCM UNIVERSITY OF EDUCATION

09.2023 - 06.2027

Junior Student, IT Major

GPA: 3.35 / 4.00 (86 credits completed)

CERTIFICATION

IELTS 6.5 (R: 7, L: 6, W: 6, S: 6)

MOS WORD & POWERPOINT CERTIFIED

GEMINI AI CERTIFICATION - GOOGLE

FOUNDATION OF UX DESIGN - GOOGLE

SKILLS

TECHNICAL SKILLS

- **Front-end:** JS, TS, ReactJS + Vite, NextJS (fundamental) , TailwindCSS and Motion
- **Back-end:** Node + Express.js, MongoDB, PostgreSQL, RESTful API.
- **Tools:** Figma, Git and Postman

SOFT SKILLS

- Understand Agile & Scrum workflow
- Proficient in Notion, Canva, Jira
- Applying AI to improve productivity

NOTABLE PROJECTS

NETFLIX | A MOVIE STREAMING WEBSITE 20th Nov 25 - Now

React.js, TypeScript, Tailwind CSS, TMDB API, Netlify

- Architected a real-time multi-profile system, using React Hooks + Firestore listeners, ensuring seamless Global State Synchronization across user sessions + devices.
- Engineered a high-fidelity UI using TailwindCSS and Motion, successfully resolving complex z-index stacking context issues during hover states.
- Optimized client-side rendering performance by 40% compared to initial load after implementing lazy loading + search debouncing.
- Deep research and analysis of Netflix for providing complex micro-interactions and fault-tolerant video, while autoplay browser policies are extremely strict.

CHATHUB | A FRIEND-MAKING TOOL 1st Nov 25 - 14th Dec 25

MERN Stack, Zustand, DaisyUI, Socket.io

- Developed a real-time messaging interface using Socket.io-client, enabling instant bi-directional communication with <100ms latency.
- Architected a highly performant global state management system using Zustand, handling complex logic like auth smoothly without slowing down the UI.
- Empowering users to personalize from picking 32 different color themes with the DaisyUI.
- Enhance perceived performance and UX with skeleton loading states, preventing Cumulative Layout Shifts (CLS).

FRUITHUB | AN ONLINE FRUITSTORE 20th Sep 25 - 30th Oct 25

MERN Stack, TailwindCSS, Cloudinary, Vercel

- Engineered a full-stack e-commerce platform, delivering a responsive customer storefront and a secure administrative dashboard.
- Architected a custom cart + checkout logic using Context API and useReducer to handle complex state transitions.
- Implemented client-side filtering & sorting for instant product discovery.
- Secured the app using JWT role-based authentication, protected React routes, and Cloudinary for scalable image hosting.
