📍 Tan Binh, HCM City, Viet Nam

ABOUT ME

- A proactive mindset and enthusiastic student, I pride myself on being a quick learner who thrives on feedback to improve product quality.
- Fascinated with building pixel-perfect, high-performance and helpful web interfaces for satisfying customers.
- Specializing in React.js, Tailwind CSS, and modern JavaScript

EDUCATION

HO CHI MINH UNIVERSITY OF EDUCATION

09.2023 - 06.2027

Junior Student, IT Major

GPA: 3.22 / 4.00

CERTIFICATION

IELTS 6.5 (R: 7, L: 6, W: 6, S: 6)

MOS WORD & POWERPOINT CERTIFIED

SKILLS

TECHNICAL SKILLS

- Front-end: JS, TS, ReactJS + Vite and Tailwind CSS + Framer Motion.
- Back-end: Node + Express.js, MongoDB, MySQL, RESTful API.
- Tools: Git, Postman, and Figma

SOFT SKILLS

- Agile/Scrum workflow
- Problem-solving + analytical thinking
- Team collaboration
- Clear documentation
- Strong sense of responsibility
- Adaptability + continuous learning

NOTABLE PROJECTS

NETFLIX | ROLE: FULL-STACK DEV

20th Nov - Present

React.js, Tailwind CSS, TMDB API, Netlify

- Using react hooks to architect a real-time multi-profile system, with Firestore listeners to ensure seamless Global State Synchronization across user sessions + devices.
- Applying Tailwind CSS and Framer Motion to engineer a high-fidelity responsive UI
- Optimized client-side rendering performance by 40% compared to initial load after implementing lazy loading + search debouncing
- Deep research and analysis of Netflix for providing complex micro-interactions and fault-tolerant video, while autoplay browser policies are extremely strict.

CHATHUB | ROLE: FULL-STACK DEV

1st Nov 25 - 14 Dec 25

MERN Stack, Zustand, DaisyUI, Socket.io

- Developed a real-time messaging interface using Socket.io-client, enabling instant bi-directional communication with <100ms latency.
- Managed app state using Zustand, handling complex logic like auth smoothly without slowing down the UI
- Allowing users to pick from 32 different color themes with the DaisyUI
- Enhance UX with skeleton loading states, preventing layout shifts.

FRUITHUB | FRONTEND DEV

20th Sep 25 - 30th Oct 25

- Architected a custom cart + checkout logic using Context API and useReducer to handle complex state transitions
- Implemented client-side filtering & sorting for instant product discovery
- Secured administrative views by building reusable protected route components to handle role-based navigation.
